

# 2010 CONFERENCE PROGRAM

[www.UMassSoils.com](http://www.UMassSoils.com)

**October 18-21, 2010**

University of Massachusetts  
Amherst, MA

**Conference Co-Directors**

**Paul Kostecki, Ph.D.**  
University of Massachusetts Amherst

**Edward J. Calabrese, Ph.D.**  
University of Massachusetts Amherst

**Clifford Bruell, Ph.D.**  
University of Massachusetts Lowell

Presented By

The Association for Environmental Health & Sciences Foundation

**140 Presenters ■ 60 Posters ■ 11 Workshops ■ 48 Exhibitors**  
**Profiles of the 2010 Lifetime Achievement Award Winners Included!**

## 2010 SPONSORS

# Workshops

Monday, October 18, 2010

8:00am – 12:00pm

1:00pm – 5:00pm

1:00pm – 5:00pm

1:00pm – 5:00pm

2:00pm – 5:00pm

2:00pm – 4:00pm

1. **Assessment and Evaluation of Vapor Intrusion at Petroleum Release Sites**, Rm 163, Lower Level
2. **Enhanced NAPL Recovery Using Surfactants**, Reading Room, Concourse Level
3. **Geochemical Evaluations of Metals in Environmental Media: How to Distinguish Naturally Elevated Concentrations from Site-Related Contamination**, Rm 917, 9<sup>th</sup> Floor
4. **Hands-On Sustainability Assessment Tools**, Rm 168, Lower Level
5. **Environmental Fate of Hydrocarbons in Soils and Groundwater**, Rm 101, Lower Level
9. **Utilization of Stable Isotopes in Environmental and Forensic Geochemistry Studies**, Rm 163, Lower Level

# Platform Sessions

Tuesday, October 19, 2010

Sessions Run Concurrently

Tuesday Morning

## Session 1 (8:30am-12:00pm)

### MARCELLUS SHALE DEVELOPMENT: ASSOCIATED ISSUES AND IMPACTS

Rm 163, Lower Level

**Moderator: Frank Peduto**

*Spectra Environmental Group, Latham, NY*

8:30am

#### Marcellus Development – The States of the Matter

*Greg Sovas, XRM, LLC, Ballston Lake, NY*

9:00am

#### What's "New" in New York? The Status of Permitting Horizontal Drilling and High-Volume Hydrofracturing

*Jean M. Neubeck and Thomas M. Johnson, Alpha Geoscience, Clifton Park, NY*

9:30am

#### FracWater Treatment for Recycling: Options, Alternatives; Their Benefits and Limitations

*Frank Miller, Lake Country FracWater Specialists, LLC, Livonia, NY*

10:00am

Break

10:30am

#### Drilling Technologies to Meet our Region's Natural Gas Needs

*John Holko, Lenape Resources, Alexander, NY*

11:00am

#### Water Use and the Marcellus Gas Play

*Jim Richenderfer, Susquehanna River Basin Commission, Harrisburg, PA*

11:30am

#### Shale Development: Economic and Policy Perspectives

*John P. Martin, New York State Energy Research and Development Authority, Albany, NY*

## Session 2 (8:30am-11:30am)

### SEDIMENTS

Rm 101, Lower Level

**Moderator: Scott Blaha**

*General Electric, Fort Edward, NY*

8:30am

#### Contaminated Sediment Management – Lessons Learned from the Inner Harbor Navigational Channel, Louisiana

*Sivaramakrishnan Sangameswaran, Bioengineering Group, Inc., Tallahassee, FL; H. Ken Wilson, Bioengineering Group, Inc., Salem, MA*

9:00am

#### Nickel and Chromium as Proxy to Identify the Origin of Sediments Adjacent To a Serpentine Outcrop

*Jane A. Parkin Kullmann, Haley & Aldrich, Boston, MA; Stephen R. Clough, Haley & Aldrich, Manchester, NH*

9:30am

#### Methods used to Delineate PCB Contamination in Sediment on the Fox River Remediation Project

*Stephen McGee, Terri Blackmar, and Dave Richardson, Tetra Tech, Inc., Green Bay, WI; Gary Braun, Tetra Tech Inc., Bothell, WA*

10:00am

Break

11:00am

#### Review of Mechanical and Hydraulic Dredging at Two Sediment Remediation Sites

*James Wescott, John Dirgo, and Jack Brunner, Tetra Tech EM, Inc., Chicago, IL; Scott Ireland and Scott Cieniawski, US EPA Great Lakes National Program Office, Chicago, IL*

11:00am

#### PCB Release Caused by Phase 1 Dredging on the Upper Hudson River

*John P. Connolly, Anchor QEA, LLC, Montvale, NJ; John G. Haggard, General Electric Company, Albany, NY*

## Session 3 (9:00am-12:00pm)

### PHYTOREMEDIATION

Reading Room, Concourse Level

**Moderators: Jason White**

*Connecticut Agricultural Experiment Station, New Haven, CT*

**Lee Newman**

*University of South Carolina, Columbia, SC*

9:00am

#### Phytoremediation of Soils Contaminated Persistent Organic Pollutants

*Jason C. White, Connecticut Agricultural Experiment Station (CAES), New Haven, CT*

9:30am

#### Assessing Tungsten Transport in the Vadose Zone: From Dissolution Studies to Soil Columns

*Gulsah Sen Tuna, Washington Braida, Adebayo Ogundipe, Center for Environmental Systems, Hoboken, NJ; David Strickland, U.S. Army Picatinny Arsenal, Picatinny, NJ*

10:00am

Break

10:30am

#### Development of Phytosensors for Monitoring Environmental Arsenic

*Blake Joyce, Jason Abercrombie, and C. Neal Stewart, Jr., The University of Tennessee, Knoxville, TN; Mark P. Elless and David Lee, Edenspace Systems Corporation, Dulles, VA*

11:00am

#### Engineering Plants for Arsenic Containment

*Om Parkash Dhankher, University of Massachusetts, Amherst, MA*

11:30am

#### Growth and Developmental Enhancement of Poplar (*Populus deltoides x nigra OP367*) by Associated Endophytic Bacteria

*Adam Hoffman, Safiyh Taghavi, Daniel van der Lelie, and Lee A. Newman, Brookhaven National Laboratory, Upton, NY; Michael Walla, University of South Carolina, Columbia, SC*

LUNCHEON SPEAKER • TUESDAY, OCTOBER 19, 2010 • 12:00PM-1:30PM • AMHERST ROOM, 10TH FLOOR, CAMPUS CENTER

## DEVELOPING HEALTH-BASED PRE-PLANNING CLEARANCE GUIDELINES FOR SITE REMEDIATION FOLLOWING A CHEMICAL TERRORIST ATTACK

**Annetta Watson, Ph.D.**, Toxicology and Hazard Assessment, Oak Ridge National Laboratory, Oak Ridge, TN

In the event of a chemical terrorist attack on a transportation hub, post-event remediation and restoration activities necessary to attain unrestricted facility re-use and re-entry could require hours to multiple days. While timeframes are dependent on numerous variables, a primary controlling factor is the level of pre-planning and decision-making completed prior to chemical release. The presenter and co-authors have identified key considerations, critical information and decision criteria to facilitate post-attack and post-decontamination remediation activities.

The presented clearance decision criteria analyses provide documentation of multi-pathway, health-based remediation exposure guidelines for 3 selected toxic industrial compounds (hydrogen cyanide, cyanogen chloride, phosgene) and 6 chemical warfare agents (5 nerve agents and the vesicant agent sulfur mustard) as well as agent degradation products) for pre-planning application in anticipation of a chemical terrorist attack.

This work has been performed by the US Department of Homeland Security as a national case study conducted in partnership with the Los Angeles International Airport and The Bradley International Terminal. All recommended guidelines have been selected for consistency with airport scenario release parameters of a one-time, short-duration, finite airborne release from a single source followed by compound-specific decontamination.

### Session 1 (1:30pm-5:30pm) SUSTAINABLE REMEDIATION/ SUSTAINABILITY

Rm 163, Lower Level

**Moderator: Michael Miller,**  
CDM, Cambridge, MA

**1:30pm**  
Sustainable Remediation: What is it and how is it applied?

Michael Miller, CDM, Inc., Cambridge, MA

**2:00pm**  
The Precautionary Principle and Sustainability: A Systems Perspective

David Ludwig, Tim Iannuzzi, and Gwen Gibson, ARCADIS, Annapolis, MD; Greg Mcgowan, ARCADIS, Santa Maria, CA

**2:30pm**  
Quantification of Greenhouse Gas Emissions and Energy Consumption from Remediation Systems

Jeff Brammer, EcoVac Services, Moore, OK; Nick Athens and Michiya Suzuki, EcoVac Services, Woodstock, GA

**3:00pm**  
Break

**3:30pm**  
Using Renewable Energy on Remediation Sites - Life Cycle Assessment of a 2.5MW Wind Turbine

Angela Fisher and William Flanagan, GE Global Research Center, Niskayuna, NY

**4:00pm**  
Sustainable Remediation and Redevelopment of Colonial-Era Paper Mill in Boston

Elliot I. Steinberg, Haley & Aldrich, Inc., Boston, MA

**4:30pm**  
Application of Sustainable Principles and Green Technologies at Brownfield Sites

John Albrecht and Michael Doherty, AECOM Environment, Rocky Hill, CT; Christopher Carleo, AECOM Environment, Westford, MA

**5:00pm**  
Changes to EPA's Spill Prevention, Control, and Countermeasure (SPCC) Program

Alex Sherrin, U.S. EPA New England Oil Program, Boston, MA

### Session 2 (1:30pm-5:30pm) CLEAN ENERGY

Room 101, Lower Level

Sponsored by Air Force Research Laboratory

**Moderator: Janine Commerford,**  
MA DEP, Boston, MA

**1:30pm**  
Personalized Energy and Water for the Non-legacy World

Daniel G. Nocera, MIT, Cambridge, MA

**2:00pm**  
Protein Design, Synthetic Biology and Hybrid Metamaterials

Ronald Koder, The City College of New York, New York, NY; Sean Elliott, Boston University, Boston, MA

**2:30pm**  
One Billion Tons of Biomass Would Be Sufficient to Completely Replace Crude Oil If We Increased Their Energy Conversion Efficiency

Percival Zhang, Virginia Tech, Blacksburg, VA

**3:00pm**  
Break

**3:30pm**  
Green Gasoline: Renewable Liquid Transportation Fuels from Plant Biomass

George W. Huber, University of Massachusetts, Amherst, MA

**4:00pm**  
Routes for Using Polymer in Photovoltaic Applications

Tom Russell, University of Massachusetts, Amherst, MA; R. Hayward, T. Emrick, B. Hammer, L. Li and D. Chen

**4:30pm**  
Charge Transport as the Basis for Clean Energy Devices

Thai Thayumanavan, University of Massachusetts, Amherst, MA

**5:00pm**  
A Path for High Volume Production of Ordered Hybrid Materials for Energy Applications

James J. Watkins, University of Massachusetts, Amherst, MA

### Session 3 (1:30pm-5:30pm) NANOTECHNOLOGY

Reading Room, Concourse Level

**Moderators: David Ludwig and Tim Iannuzzi,**  
ARCADIS, Annapolis, MD

**Kate Sellers,** ARCADIS, Chelmsford, MA

**1:30pm**  
Nanotoxicology: Is There a "There" There?

John Schell, ENTRIX, Houston, TX

**2:00pm**  
Nanomaterial and Human Health

Debra Kaden, ENVIRON International Corporation, Boston, MA

**2:30pm**  
A Collaborative Effort to Promote the Safe Development of Nanotechnology in Massachusetts

Carol Rowan West, Department of Environmental Protection, Boston, MA

**3:00pm**  
Break

**3:30pm**  
The Aquatic Toxicity of Nanoparticles: Knowledge, Needs, and the Role of Water Quality in Altering Nanoparticle Toxicity

Scott Hall, ENVIRON, Brentwood, TN

**4:00pm**  
Nanomaterials for Water Treatment: Advantages and Implications for Fate and Transport

Gautham B. Jegadeesan, Gradient, Cambridge, MA

**4:30pm**  
The Precautionary Principle Uses and Abuses: Lessons Learned for Emerging Technologies

David Ludwig, Tim Iannuzzi, and Gwen Gibson, ARCADIS, Annapolis, MD; Greg Mcgowan, ARCADIS, Santa Maria, CA; Kate Sellers, ARCADIS, Chelmsford, MA

**5:00pm**  
Regulatory Developments and Product Stewardship

Kate Sellers, ARCADIS, Chelmsford, MA

### Session 4 (1:30pm-5:30pm) INTERNATIONAL SOIL & GROUNDWATER REMEDiation CASE HISTORIES

Rm 168, Lower Level

Sponsored by Remediation Partners

**Moderator: Richard Cartwright,**  
MECX, LP, East Amherst, NY

**1:30pm**  
International In Situ Bioremediation Case History

Richard Raymond, Michael D. Lee, and Toru Chino, Terra Systems, Inc., Wilmington, DE

**2:00pm**  
Use of High Resolution Site Characterization Tools to Optimize Remediation Performance

John Sohl, Columbia Technologies, Inc., Baltimore, MD

**2:30pm**  
Increased In Situ Remediation Efficacy Via Innovative Injection Technology

Patrick Hicks, Wavefront Energy and Environmental, Limited, Raleigh, NC

**3:00pm**  
Break

**3:30pm**  
Design, Field Application, and Verification of Pneumatically Injected Permeable Reactive Barriers

Deborah Schnell, Pneumatic Fracturing, Inc., Alpha, NJ

**4:00pm**  
Use of Waterloo Barrier Groundwater Containment Wall in Brownfields Redevelopment

Robbie Laird, C3 Environmental, Limited, Breslau, ON, Canada

**4:30pm**  
International Metals Treatment Case History

James Barthel, Metals Treatment Technologies, Inc., Arvada, CO

**5:00pm**  
International In Situ Chemical Oxidation Remediation Case History (Trento, Italy)

Richard Cartwright, MECX, LP, East Amherst, NY

### Tuesday Workshops

**6. Nanotechnology: Applications in Environmental Remediation**

7:00pm - 9:00pm, Rm 163, Lower Level

**7. LSP Board Disciplinary Case Workshop**

6:30pm - 9:30pm, Rm 101, Lower Level

**8. In-Situ Thermal Remediation**

6:30pm - 9:30pm, Rm 168, Lower Level

### Poster Sessions

4:00pm - 6:00pm, Rm 162 and 165, Lower Level

Authors Will Be Available For Individual Discussion At Their Posters, Tuesday & Wednesday.

### Social

4:30pm - 6:00pm, Exhibit Hall

Refreshments and light hors d'oeuvres will be available.

# Platform Sessions

Wednesday, October 20, 2010

Sessions Run Concurrently

Wednesday Morning

## Session 1 (8:30am-12:00pm)

### VAPOR INTRUSION I

Rm 163, Lower Level

**Moderator: Ellen Moyer,**  
CH2M Hill, Montgomery, MA

#### 8:30am Assessment of Chlorinated Hydrocarbon Sources: Case Studies of Non-Groundwater Sources of Vapor Intrusion

Catherine G. Wanat, MA DEP, Springfield, MA

#### 9:00am Hydrocarbon and Oxygen Transport in the Vicinity of a Building Overlying a NAPL Source Zone

Hong Luo, Paul Dahlen, and Paul C. Johnson, Arizona State University, Tempe, AZ

#### 9:30am Vapor Intrusion Assessment – A Comparative Analysis of Subsurface Vapor Sampling Methods

Laurent C. Levy, Sanborn, Head & Associates, Inc., Westford, MA; David Shea, Head & Associates, Inc., Concord, NH; Daniel B. Carr, Head & Associates, Inc., Portland, ME

#### 10:00am Break

#### 10:30am Evaluating Vapor Intrusion as a Source of Petroleum Hydrocarbons to Indoor Air: A Case Study

Caroline B. Tuit, Eric L. Butler, and Kim R. Reid, Gradient Corporation, Cambridge, MA

#### 11:00am Transport and Biodegradation of Petroleum Hydrocarbon Vapor in the Subsurface: A Soil Column Study

Elsy A. Escobar, Paul Dahlen, and Paul C. Johnson, Arizona State University, Tempe, AZ

#### 11:30am Use of Stable Isotope Analysis to Distinguish Between Vapor Intrusion and Indoor Sources of VOCs

Thomas McHugh, GSI Environmental, Houston, TX; Kyle Gorder, Hill AFB; Stephanie Fiorenza, BP America; Richard Philp and Tomasz Kuder, University of Oklahoma; Joe Odencrantz and Harry O'Neill, Beacon Environmental, Bel Air, MD

## Session 2 (9:00am-11:30am)

### NAPL

Rm 101, Lower Level

**Moderator: Tracy Roth,**  
LFR Inc., an ARCADIS Company, Manchester, CT

#### 9:00am Evaluating LNAPL Remedial Technologies for Achieving Project Goals

Pamela S. Trowbridge, Pennsylvania Department of Environmental Quality, Harrisburg, PA; Lily Barkau, Wyoming Department of Environmental Quality, Cheyenne, WY

#### 9:30am Soil Coring and Analysis Approach for Assessing Treatment Effects on LNAPL Smear Zones

Ben McAlexander, Trihydro Corporation, Ann Arbor, MI; Jim Gleason, Trihydro Corporation, Laramie, WY

#### 10:00am Break

#### 10:30am In Situ Chemical Oxidation (ISCO) for Reducing Emissions from Lower Permeability Zones to Groundwater Flowing Through More Permeable Zones

Bridget Cavanagh, Paul Dahlen, and Paul Johnson, Arizona State University, Tempe, AZ

#### 11:00am Integrating Heat with Biological, Chemical and Physical Processes for Soil and Groundwater Remediation

Mark Kluger, Dajak, LLC, Wilmington, DE

## Session 3 (9:00am-12:00pm)

### DEGRADATION OF POLYCHLORINATED BIPHENYLS

Reading Room, Concourse Level  
Sponsored by Kerfoot Technologies

**Moderator: William B. Kerfoot,**  
Kerfoot Technologies, Inc., Mashpee, MA

#### 9:00am Coated Micro to Nanobubble Ozone Reactivity and Field Treatment with PCPs, PAHs, and PCBs

William B. Kerfoot, Kerfoot Technologies, Inc., Mashpee, MA

#### 9:30am Pressure-Assisted Ozonation of PCB and PAH Contaminated Sediments

P.K. Andy Hong, University of Utah, Salt Lake City, UT

#### 10:00am Break

#### 10:30am Implementation of Ozone-based In-situ Remediation of a PCB and Total Petroleum Hydrocarbon Release

Jeffrey C. Dey, Imtiyaz A. Khan, and John M. Mateo, The Resource Companies, Moorestown, NJ

#### 11:00am PCBs in Building Material

Kimberly N. Tisa, U.S. EPA, Boston, MA

#### 11:30am Hudson River Dredging Project- Sediment Dewatering and Water Treatment

Scott Blaha and Tim Kruppenbacher, General Electric Company, Fort Edward, NY; Sid Archinal, Shaw Environmental & Infrastructure, Trenton, NJ; David Stahl, Shaw Environmental & Infrastructure, Latham, NY

## AEHS ONLINE INFORMATION SESSION

Wednesday, October 20, 7:00pm-8:00pm, 168 Lower Level

Please join Dr. Paul Kostecki and Dr. David Ludwig, Director for Education and Training, AEHS Foundation for a special information session to discuss the Foundation's latest venture: Professional Education and Online Learning. We will be addressing questions related to online teaching and learning and encourage anyone interested in participating in, or potentially teaching for AEHS Online to attend.

LUNCHEON SPEAKER • WEDNESDAY, OCTOBER 20, 2010 • 12:00PM-1:30PM • AMHERST ROOM, 10TH FLOOR, CAMPUS CENTER

## WIRING MICROBES TO THE SUN: SUSTAINABLE ENERGY AND BIOREMEDIATION WITH MICROBE-ELECTRODE INTERACTIONS

Derek R. Lovley, Department of Microbiology, University of Massachusetts, Amherst, MA

The discovery that microorganisms can exchange electrons with electrodes has led to many applications. Our most recent finding is the process of microbial electrosynthesis in which solar energy captured with photovoltaics is used to power microorganisms to fix carbon dioxide into organic carbon products that are excreted from the cell. The overall reaction of combining sunlight, water, and carbon dioxide to produce organic carbon is the same as photosynthesis but microbial electrosynthesis does not require arable land; does not have the pollution risks associated with intensive agriculture; and is much more efficient in producing desired products. Microbe-electrode processes have also been developed for accelerating the degradation of hydrocarbons in contaminated marine sediments; for enhancing reductive dechlorination solvents and chlorinated aromatics; and for promoting reductive precipitation of uranium from contaminated waters. An improving understanding of the mechanisms for microbe-electron exchange is providing the basic understanding needed to further optimize these energy and bioremediation applications.

# Platform Sessions

Wednesday, October 20, 2010

Sessions Run Concurrently

Wednesday Afternoon

## Session 1a (1:30pm-3:00pm)

### VAPOR INTRUSION II

Rm 163, Lower Level

**Moderator: Ellen Moyer,**  
CH2M Hill, Montgomery, MA

1:30pm

**Statistical Analysis and Comparison of Indoor, Basement and Ambient Air Data Collected at Over 150 Homes between July 2004 and January 2010**

*Atul M. Salhotra, RAM Group of Gannett Fleming, Inc., Houston, TX*

2:00pm

**Designing Vapor Intrusion Remedies for a Wide Variety of Conditions –at a Single Site**

*William F. Simons, James R. Ash, and Ileen S. Gladstone, GEI Consultants, Inc., Woburn, MA; Laurence J. Welch Jr., GEI Consultants, Inc., Falmouth ME*

2:30pm

**Comparative Studies Involving Long-Term and Short-Term Organic Vapor Monitoring**

*Jack D. Fox and William H. Brew, Vapor Trail Analytics LLC, Rochester, NY*

3:00pm

Break

## Session 1b (3:30pm-5:30pm)

### REGULATORY PANEL DISCUSSION - GRAPPLING WITH VAPOR INTRUSION

Rm 163, Lower Level

**Moderator: Ellen Moyer,**  
CH2M Hill, Montgomery, MA

**Panelists:**

*John Boyer, NJ DEP, Trenton, NJ  
John Fitzgerald, MA DEP, Wilmington, MA  
Robin Mongeon, NH Department of Environmental Services, Concord, NH  
William Wertz, NYS DEC, Albany, NY  
Carl Gruszczak, Jr., CT DEP, Hartford, CT*

## Session 2 (1:30pm-4:30pm)

### PCBS

Rm 101, Lower Level

**Moderator: Paul W. Locke,**  
MA DEP, Boston, MA

1:30pm

**Exposure to PCBs from Waste Sites Via Consumption of Homegrown Produce**

*Greg Braun, MA DEP, Boston, MA*

2:00pm

**PCBs in Building Caulk – Health Hazard or Regulatory Over-Reaction?**

*James D. Okun, O'Reilly, Talbot & Okun Associates, Inc., Westborough, MA*

2:30pm

**Relationship between Sediment Morphology and PCB Contamination in the Acushnet River, New Bedford, Massachusetts**

*Michael Morris, Anita Rigassio Smith, and Joshua Cummings, Jacobs Engineering, New Bedford, MA; Dave Walsh, Woods Hole Group, E. Falmouth, MA*

3:00pm

Break

3:30pm

**Discovery, Assessment and Remediation of PCB-Contaminated Residential Fill Properties in Pittsfield, Massachusetts**

*John F. Ziegler and Joanne Flescher, MA DEP, Springfield, MA*

4:00pm

**Comparison of Analyzing and Quantifying Total PCBs by Different Methods at the New Bedford Harbor Superfund Site OU#3 Site**

*Mark R. Koenig and Bob Leitch, US Army Corps of Engineers, Concord, MA; Elaine Stanley, US EPA Region 1, Boston, MA*

## Session 3 (1:30pm-5:00pm)

### ENVIRONMENTAL FORENSICS

Reading Room, Concourse Level

**Moderator: Dallas Wait,**  
Gradient Corporation, Cambridge, MA

1:30pm

**A Review of Current Technologies for the Development and Depiction of Conceptual Site Models-Legal and Technical Considerations**

*David Griffin, Griffin & Associates, San Diego, CA*

2:00pm

**Environmental Forensic Isotopes Support Chlorinated Solvent Investigation/Green Remediation**

*Yi Wang, Zymax Forensics, Escondido, CA*

2:30pm

**Potential Long-Term Environmental and Health Impacts of Tetraethyllead (TEL) on U.S. Urban Residential Areas**

*Richard Hurst, Hurst & Associates, Inc., Thousand Oaks, CA*

3:00pm

Break

3:30pm

**The Utility of BTEX for Evaluation of Petroleum Releases**

*Nathan Stevens, Christopher Johnson, Martin Hilfinger, and Raymond Leather, Cumberland Gulf Group of Companies, Framingham, MA*

4:00pm

**Forensic Use of Quantitative Indices of Hydrocarbon Weathering in Geochemical Investigations**

*Michael J. Wade, Wade Research, Inc., Marshfield, MA*

4:30pm

**Factors to Consider When Constraining the Time of Release of Gasoline LNAPL Based on Total Lead Concentration**

*Gregory S. Douglas, Steven D. Emsbo-Mattingly, Scott A. Stout, Allen D. Uhler, and Kevin J. McCarthy, NewFields Environmental Forensics Practice, Rockland, MA*

## Session 4 (1:30pm-4:30pm)

### SITE REMEDIATION – DIAGNOSTICS, IN-SITU TREATMENT, AND VAPOR INTRUSION

Rm 168, Lower Level

Sponsored by Regenesis

**Moderator: Maureen Dooley,**  
Regenesis, Wakefield, MA

1:30pm

**The Use of RegenOx based ISCO as a Mass Reduction Technology**

*David S. Peterson, Regenesis, Red Hook, NY; Maureen Dooley, Regenesis, Wakefield, MA*

2:00pm

**Practical Applications of In Situ Microcosm Studies as a Predictive Tool**

*Matthew Burns, WSP Environment & Energy, Woburn, MA; Colleen Myers, WSP Environment & Energy, Cuyahoga Falls, OH; Glen Rieger, WSP Environment & Energy, Pittsburgh, PA*

2:30pm

**Treatment of MTBE in Groundwater Using Chemical Oxidation and Enhanced Bioremediation**

*Rick G. McGregor, Vertex Environmental, Inc, Cambridge, ON, Canada*

3:00pm

Break

3:30pm

**BioChemical Treatment of a Hydraulically Complex Hexavalent Chromium Plume**

*Richard J. Desrosiers, GZA GeoEnvironmental, Bloomfield, CT; I. Richard Schaffner, GZA GeoEnvironmental, Manchester, NH*

4:00pm

**Vapor Intrusion Mitigation Approaches in a Retrofit Application using a Chemical Resistant Barrier**

*Scott Freeman, Cedarview Projects, Inc., Reading, MA; Kelly Ameli, Land Science Technologies, San Clemente, CA*

## Wednesday Workshops

### 10. In-Situ Chemical Oxidation

6:30pm – 9:30pm, Rm 163, Lower Level

### 11. Incorporating Green into the Cleanup Dialogue: The Green Remediation, Sustainable Remediation and Green Chemistry Workshop

7:00pm – 9:00pm, Rm 101, Lower Level

## Poster Sessions

4:00pm - 6:00pm, Rm 162 and 165, Lower Level

Authors Will Be Available For Individual Discussion At Their Posters, Tuesday & Wednesday.

**WINE RECEPTION** Wednesday, 5:00pm - 7:00pm, Exhibit Hall

Wine, refreshments, and light hors d'oeuvres will be available • Free to all registered conference attendees • Exhibits will be open

Sponsored by

## Session 1 (9:00am-12:00pm)

### BIOREMEDIATION

Rm 163, Lower Level

**Moderator: Matthew Burns,**  
WSP Environment & Energy, Woburn, MA

9:00am

#### The Nature of Subsurface Dissolved Oxygen

Marcia J. Berger, Isaac Anderson, and Leonard V. Rappoli, Clean Properties, Inc., Sudbury, MA

9:30am

#### Expediting Site Closure of a 1,1,1-TCA Plume Using In Situ Bioremediation

Brian J. Cote, Shaw Environmental & Infrastructure, Inc., Stoughton, MA; Tarek Ladaa, Shaw Environmental & Infrastructure, Inc., Knoxville, TN; Ray Larkin, Philips Electronics North America Corporation, North Kingstown, RI

10:00am

#### Break

10:30am

#### Using Blended Substrate Formulations to Enhanced Reductive Dechlorination

Michael R. Sieczkowski, JRW Bioremediation, L.L.C., Lenexa, KS

11:00am

#### Combining Bioaugmentation Cultures to Treat Complex Mixtures of High-Concentration Volatile Organic Compounds – Bench Test Findings

Chris Voci, Geosyntec Consultants, Lawrenceville, NJ; Neal Durant, Geosyntec Consultants, Columbia, MD; Jeff Roberts, SiREM Laboratory, Guelph, ON, Canada

11:30am

#### Use of Positron Emission Tomography to Study Radionuclide Biomineralization and Sequestration in Oxygenated Subsurface Soils

Karen Kinsella, David J. Schlyer, and Joanna S. Fowler, Brookhaven National Laboratory, Upton, NY; Robert J. Martinez and Patricia A. Sobecky, University of Alabama, Tuscaloosa, AL

## Session 2 (8:30am-12:00pm)

### HEAVY METALS

Rm 101, Lower Level

**Moderator: Peter Woodman,**  
Risk Management Incorporated, Acton, MA

8:30am

#### An Analytical Differentiation between Elemental and Total Mercury and Its Application in Remedial Evaluation

Donna M. Davis, Adam P. Chen, Joan V. Gonzalez, and Ivan G. Williamson, Burns & McDonnell Engineering, Inc., Downers Grove, IL

9:00am

#### In Situ Chemical Reduction for Groundwater Chromium Stabilization

John Valkenburg, Adventus Americas, Inc., DeWitt, MI; Josephine Molin, Adventus Americas Inc., Freeport, IL; Andrzej Przepiora, Envirometal Technologies, Inc., Waterloo, ON, Canada,

9:30am

#### Gender Effects of a Chemical Mixture of Toluene, Trichloroethylene and Phenol on the Dermal Bioavailability of Nickel in Pig Skin

Mohamed S. Abdel-Rahman and Rita M. Turkall, New Jersey Medical School, Newark, NJ

10:00am

#### Break

10:30am

#### Treatability Testing of Chromium-Impacted Groundwater with Zero-Valent Iron and Siderite

Cherilyn Carrara, Thomas A. Krug, and Cory Repta, Geosyntec Consultants, Guelph, ON, Canada

11:00am

#### Analysis of the Occurrence of Barium, Selenium and Silver in Natural and Historic Fill Soils

William R. Swanson, CDM, Inc., Cambridge, MA

11:30am

#### Treatment of Arsenic-Contaminated Materials Using Selected Stabilization and Solidification Technologies

Paul M. Randall, U.S. EPA, Cincinnati, OH

## Session 3 (8:00am-12:00pm)

### FATE & TRANSPORT

Reading Room, Concourse Level

**Moderator: Kathy Creighton,**  
Shaw Group, Stoughton, MA

8:00am

#### Greenhouse Gas Emissions Modeling: A Tool for Federal Facility Decommissioning

Karen L. Petho, Christopher D. Zevitas, Adam F. Klauber, and Jonathan D. Cybulski, USDOT/Volpe Center, Cambridge, MA

8:30am

#### Monitoring of an Ethanol Released into Gasoline Residuals Using High Frequency Ground Penetrating Radar

John D. Mosquera, Juliana G. Freitas, and Anthony L. Endres, University of Waterloo, ON, Canada

9:00am

#### Remediation Optimization with Optical Screening Tools

Randy St. Germain, Dakota Technologies, Inc., Fargo, ND

9:30am

#### Development of a Mobile Laboratory System for Site Characterization and Analysis of Subsurface Contaminants

Ala'a Ismail, Majid Al-Rasheedi, and Michael Quinn, Kuwait Institute for Scientific Research, Safat, Kuwait

10:00am

#### Break

10:30am

#### Optimization of a Large Pump and Treat System at the Massachusetts Military Reservation

Paul S. Nixon, Army Environmental Command Impact Area Groundwater Study Program, Camp Edwards, MA; Michael Kulbersh, Army Corps of Engineers, Concord, MA

11:00am

#### Fate of Ethanol Fuels in the Source Zone and Implications to Downgradient Transport

Juliana G. Freitas and James F. Barker, University of Waterloo, ON, Canada

11:30am

#### Simulation of Pilot Scale In Situ Fixation of a Hexavalent Chromium Plume at the Puchack Well Field Superfund Site

Matthew Gamache and Robert P. Schreiber, CDM, Inc., Cambridge, MA; Frank Tsang, CDM Inc., New York, NY

LUNCHEON SPEAKER • THURSDAY, OCTOBER 21, 2010 • 12:00PM-1:30PM • AMHERST ROOM, 10TH FLOOR, CAMPUS CENTER

## UPDATE ON THE HUDSON RIVER DREDGING PROGRAM

Tim Kruppenbacher

Operations Manager, GE Corporate Environmental Program, Fort Edward, NY

This presentation will describe the recent dredging test project and review the results and next steps.

### Session 1 (1:30pm-4:30pm)

#### INNOVATIVE AND ALTERNATIVE REMEDIAL TECHNOLOGIES

Rm 163, Lower Level

**Moderator: Scott Saroff,**  
Michael Baker, Jr., Moon Township, PA

#### 1:30pm Effects of Cometabolism on Aerobic 1,2-dibromoethane Degradation

Kyunghwa Baek, Robert McKeever, Kahlil Rieber,  
Diane Sheppard, Chul Park, and Klaus Nüsslein,  
University of Massachusetts, Amherst, MA; Sarina J.  
Ergas, University of South Florida, Tampa, FL; Rose  
Forbes, HQ AFCEE, Otis ANG Base, MA; Mark  
Hilyard, CH2M HILL, Otis ANG Base, MA

#### 2:00pm Treatment of "MGP" Groundwater Contaminated With Complexed Cyanides, Heavy Metals and Various Organics Using a Three Stage Ozone Advanced Oxidation Process

L. Joseph Bollyky, Bollyky Assoc., Inc, Stamford, CT;  
Lance A. Downs, Advanced Remediation Tech. Inc.,  
Canby, OR

#### 2:30pm Moving from Ex Situ to In Situ Remediation: Improved Subsurface Injection & Hydro- Fracturing Technologies – It's a Contact Sport

John V. Fontana and Vincent E. Barlock, Vista  
GeoScience, Golden, CO; Seth Hunt, Foremost  
Solutions, Lakewood, CO

#### 3:00pm Break

#### 3:30pm Evaluation of Two Methods of In Situ Treatment in Fractured Bedrock at a Residential Fuel Release Site

Geoffrey A. Brown, Andrew W. Fiedler, and Roger P.  
Thibault, ENPRO Services, Inc., Newburyport, MA;  
Raymond G. Ball and Jim Elsenbeck, EnChem  
Engineering, Inc., Newton, MA

#### 4:00pm Applications and Benefits of Groundwater Recirculation for Electron Donor Delivery and pH-Adjustment During Enhanced Anaerobic Dechlorination

David Falatko, Innovative Engineering Solutions,  
Inc, South Portland, ME; Sami A. Fam, Innovative  
Engineering Solutions, Inc., Walpole, MA; George  
Pon, Bioremediation & Treatability Center,  
Walpole, MA

### Session 2 (1:30pm-5:30pm)

#### SITE ASSESSMENT/FIELD SAMPLING

Rm 101, Lower Level

**Moderator: Cosmo Gallinaro,**  
Common Sense Environmental, Inc., New Bedford, MA

#### 1:30pm Incremental Sampling – A Case History of Site Characterization and Cleanup Verification

Mark C. Gemperline, MCG Geotechnical  
Engineering, Inc., Morrison, CO

#### 2:00pm Computer Assisted Data Management and the Triad Approach: A Case Study Addressing Problems and Potentials for Successful Remedial Investigations

Arnold L. Gray, EarthSoft, Inc., Sterling, MA; Jason  
C. Ruf, S2C2, Inc., Raritan, NJ

#### 2:30pm Angle Drilling, ISCO, and Groundwater Recovery to Address a Fuel Oil Release Beneath a School

Geoffrey A. Brown and Michael E. Coty, ENPRO  
Services, Inc., Newburyport, MA; Denis D'Amore,  
D'Amore Associates, Inc., Lancaster, MA

#### 3:00pm Break

#### 3:30pm Application of Triad Approach during Investigation, Planning, and Remediation at an NPL Site

Jason D. McNew, EA Engineering, Science, and  
Technology, Edgewood, MD

#### 4:00pm High Resolution Site Characterization

Seth Pitkin, Stone Environmental, Inc., Montpelier, VT

#### 4:30pm Extracting VOCs from Low Permeability and/ or High Organic Carbon Content Soil Matrices: Challenges and Solutions

Michael Rossi, Stone Environmental, Inc.,  
Montpelier, VT

#### 5:00pm Using Innovative Technologies Such as XRF, RTS/GPS, and GIS to Conduct Dynamic Investigations, Remedial Actions, and Waste "Pre-Characterization" on Government and Commercial Projects

Randy McBride, Shaw Environmental and  
Infrastructure, Inc., Knoxville, TN

### Session 3 (1:30pm-4:30pm)

#### ADVANCED TOOLS

Rm 168, Lower Level

**Moderator: Tracy Roth,**  
LFR Inc., an ARCADIS Company, Manchester, CT

#### 1:30pm Use of Stable Isotope Analysis to Assess Biodegradation of Gas-Phase Volatile Organic Compounds in the Unsaturated Zone

Daniel Bouchard and Daniel Hunkeler, University of  
Neuchatel, Neuchatel, Switzerland; Patrick Höhener,  
Université de Provence, Marseille, France; Fabien  
Cornaton, Tecnológico de Monterrey, Monterrey,  
México

#### 2:00pm Confirming Contaminant Destruction and Optimizing In Situ Chemical Oxidation Application Using Compound Specific Isotope Analysis

Matthew Burns, WSP Environment & Energy,  
Woburn, MA; Robert J. Pirkle, Microseeps, Inc.,  
Pittsburgh, PA

#### 2:30pm Reactive Fluorinated Substrate Analogs for Characterizing MTBE and TBA Biodegradation

Michael R. Hyman, Alan House, and Jeff Massey,  
North Carolina State University, Raleigh, NC

#### 3:00pm Break

#### 3:30pm A Multi-component Natural Gradient Tracer Study in Support of the Forensic Analysis of an Oxygenated Gasoline Release

Joseph E. Haas II, New York State Department of  
Law, New York, NY; Dan Cornacchiulo,  
Environmental Assessment and Remediations,  
Patchogue, NY; Dominique Sorel, S.S. Papadopoulos  
& Associates, Inc., Montreal, Quebec, Canada

#### 4:00pm Applications of Stable Isotopes to a Petroleum Site

Gerard Spinnler, Shell Global Solutions (US) Inc,  
Houston, TX

## STUDENT AWARD

We are proud to announce the 7th consecutive year of the  
**Adventus Americas Student Awards**  
for best platform and poster presentation

**\$1000 each will be awarded to the two best student presentations.  
Winners will be announced at the Thursday luncheon.**

# Poster Sessions

Authors will be available for individual discussion at their poster(s) from 4:00pm – 6:00pm each day

## ANALYSIS

### An Analytical Strategy for Distinguishing Differences Between JP-4 and JP-8 Jet Fuels Using Primary Hydrocarbon Constituents

Peter J. Cagnetta and Heather L. Steffe, SAIC, Harrisburg, PA; Alan Klavans, Air National Guard, Andrews Air Force Base, MD

### The Evaluation of Sampling Efficiency of Polychlorinated Biphenyls as AROCLOR 1242, 1248, 1254 and 1260 Using

Polyurethane Foam (PUF) Sampling and Analysis by USEPA Method 8082 GC/ECD  
Ann C. Casey, Robert E. Wagner, Anthony Maiello, and Carrie Barss, Northeast Analytical, Inc., Schenectady, NY

### Environmental Analysis and Water Quality Exposure Monitoring of Environmental Waters using an In Vitro Bioassay System in Nara II

Akiyoshi Sawabe, Katsuaki Sasai, Kazuki Ikushima, Ryuji Takeda, and Akira Iida, Kinki University, Nakamachi, Japan; Shiho Kageyama, Ryo Kamata, Daisuke Nakajima, and Fujio Shiraiishi, National Institute for Environmental Studies, Ibaraki, Japan

## ARSENIC

### Laboratory and Field Experiments on Microbial Transformation of Arsenic

Claudia Gallert, Dominik Freikowski, and Josef Winter, Karlsruhe Institute of Technology, Karlsruhe, Germany

### Comparison Between XRF and Atomic Absorption Spectroscopy for the Determination of Total Arsenic in Soil

Cielito DeRamos King, Bridgewater State College, Bridgewater, MA

### Arsenic Treatment Plant Limitations and Upgrades

David Reault, Fred Santos, and Willard Murray, ECC, Marlborough, MA; Robert Simeone, BRAC Environmental Office, Devens, MA

### Structural Alteration of an Aquatic Macrophyte Community Along a Gradient of Arsenic Concentrations: Implications for Habitat Quality

John D. Schaffer, Tetra Tech EC, Inc, Morris Plains, NJ

## CHEMICAL OXIDATION

### “Real-Time” Treatment Optimization Utilizing In Situ Chemical Oxidation

Will Moody and Dan Bryant, Geo-Cleanse International, Inc., Matawan, NJ; Eric Schlauch, Hudson Environmental Services, Inc., Somerville, NJ

### Residual Persulfate and How it Affects Post-ISCO Performance Evaluation

Richard Purdy, Paul M. Dombrowski, and Barbara A. Weir, AECOM Environment, Wakefield, MA; James Brown, US EPA, Boston, MA

## ENERGY

### Combining Subsurface Exploration Technologies to Support Electric Utility Modernization

Erin Kirby, Robert Clemens, and Peter King, Golder Associates, Inc., Manchester, NH; Brent Sowle, Public Service of New Hampshire, Bow, NH

### Home Owner Survey of Their Photovoltaic Systems in Virginia

Douglas Mose, George Siaway, and James Metcalf, George Mason University, Fairfax, VA

### Renewable Energy from Landfill Gas, Wind Power and Solar Energy on a Former Landfill Site

Josef Winter and Claudia Gallert, Karlsruhe Institute of Technology, Karlsruhe, Germany

## ENVIRONMENTAL FATE & MODELING

### Application of Vadose Zone Modeling to Evaluate Remedial Alternatives at a Shooting Range in New Jersey

Liliana Cecan, Langan Engineering & Environmental Services, Doylestown, PA; Chris Neuffer, EnviroTactics; Robert Schneider, Environmental Software Consultants, Inc.

### Studying Rocket Fuel Components' Migration in Soils Under the Conditions of Field Model Experiment

Pavel Krechetov, T.V. Koroleva, and O.V. Chernitsova, Lomonosov Moscow State University, Moscow, Russian Federation

## GENERAL

### The Dredging of the Lower Niger River - How NDES Communications Effort Influenced It

Moses Braimah, Nigeria Environmental Society, Nigeria

### Qualitative and Quantitative Assessment of Oxide Layers of Steam Lines in Industrial Boilers

Neda Deris and Mahmoud Paykari, Abadan Institute of Technology, Boverde Shomali, Iran

### Utilization of Waste Water, Soils, Rocks as a Fuel in the Transportation via Rkees Hill Train

Rijan Karkee, Nobel Academy Higher Secondary School, Kathmandu, Nepal

### Process-Driven Beneficial Re-Use of Decommissioning and Demolition Debris: Integration into Site Redevelopment

James M. Marcus and Daniel O. Wybenga, S&ME, Inc., Spartanburg, SC; Ashley E. Sapyta, S&ME, Inc., Greenville, SC

### Fluorosis Mitigation: An Integrated Approach

Gopal Pathak, Birla Institute of Technology, Mesra, Ranchi, India

### Assessing the Relationship between Methane Gas and Barometric Pressure at Shepley's Hill Landfill - Former Fort Devens in Ayer, MA

Fred Santos, Willard Murray, and David Reault, ECC, Marlborough, MA; Robert Simeone, BRAC Environmental Office, Devens, MA

## HEAVY METALS

### Mercury Pollution Near a Chlor-Alkali Plant in Northern Kazakhstan

Paul M. Randall, U.S. EPA, Cincinnati, OH

### Surfactant Facilitated Remediation of Heavy Metal Contaminated Soils: Efficacy and Ecotoxicological Consequences

Ilya B. Slizovskiy and Jason W. Kelsey, Muhlenberg College, Allentown, PA; Paul B. Hatzinger, Shaw Environmental, Inc., Lawrenceville, NJ

### Heavy Metal Accumulation of *Phytolacca americana* Hairy Root

Ryuji Takeda, Masato Tomita, Akira Iida, and Akiyoshi Sawabe, Kinki University, Nakamachi, Japan

## LEGAL ISSUES/ ENVIRONMENTAL FORENSICS

### Managing Evidence from Polluter Pay Principle to Owner Pay Principle: What Contribution from Environmental Forensics

Jean Francois David, Expert près la Cour d'Appel de Versailles, Garches, France

### Put Comprehensive Enterprise Environmental Risk Management to Work for You

John G. Nevius, Anderson Kill & Olick, P.C., New York, NY

### Protect Yourself and Your Clients: Insurance 101 for Environmental Professionals

John G. Nevius, Anderson Kill & Olick, P.C., New York, NY

### Climate Change Liability: Are You Covered?

John G. Nevius, Anderson Kill & Olick, P.C., New York, NY

## NAPL

### Expedited Large Scale NAPL Plume Removal Utilizing Mobile Remediation Solutions

Jeff Brammer, EcoVac Services, Moore, OK; Nick Athens, EcoVac Services, Woodstock, GA

### Assessment of the Natural Attenuation of NAPL Source Zones and Post-Treatment NAPL Source Zone Residuals

Ryan Ekre, Paul C. Johnson, and Paul Dahlen, Arizona State University, Tempe, AZ; Bruce Rittman and Rosie Kramalnik-Brown, Biodesign Institute at Arizona State University, Tempe, AZ

## Evaluation of LNAPL Specific Thickness to Assist in Remedy Selection

Sam J. Smith, Maura E. Maloney, and Lingke Zeng, Shaw Environmental and Infrastructure, Inc., Knoxville, TN

## REMIEDIATION

### Power Plant and MGP Sites Remediated Economically With Organoclay

George Alther, Biomin, Inc., Ferndale, MI

### Case Studies of In Situ Remediation of Chlorinated and Hydrocarbon Impacted Sites Using Hydraulic Fracturing Technologies

Vincent E. Barlock and John V. Fontana, Vista GeoScience, Golden, CO; Scott D. Andrews, Essential Management Solutions (EMS), Evergreen, CO; Sara Handy, ARCADIS, Lakewood, CO

### Soils/Sediments Treatment Processing Technologies

James Barthel, MT2, LLC, Arvada, CO

### Is Environmental Remediation Static or Dynamic: Case Studies

Nazmul Haque, Leslie D. Schultheis and Apurva Patil, Kleinfelder, Hanover, MD

### Chemical Treatment of PCB Contaminated Soils

Agnis Morrow, Victor F. Medina, and Scott Waisner, U.S. Army Engineer Research & Development Center, Vicksburg, MS; Charles Coyle, U.S. Army Corps of Engineers

### Assessing Rates of Biochemical Degradation for Chlorinated Solvents Using Laboratory and Field-Based Techniques

Jonathan Ordway, Sanborn, Head & Associates, Inc., Portland, ME; David Shea, Sanborn, Head & Associates, Inc., Concord, NH

### Linear Infiltration Landscapes Along Urban Streets - A Comparative Review of Aesthetic Values and Utility Objectives

Frank Slegers, University of Massachusetts, Amherst, MA; Daniel Roehr, The University of British Columbia, Vancouver, BC, Canada

### EHC® In Situ Chemical Reduction Technology for In Situ Treatment of Chlorinated Volatile Organic Compounds

Ravikumar Srirangam and Fayaz Lakhwala, Adventus Americas, Inc., Union, NJ; Jim Mueller, Adventus Americas Inc., Freeport, IL

### EHC-O®: Oxygen Releasing Compounds for In Situ Bioremediation of Petroleum Hydrocarbons

Ravikumar Srirangam and Fayaz Lakhwala, Adventus Americas, Inc., Union, NJ; Jim Mueller, Adventus Americas Inc., Freeport, IL

### PCE Source Zone Remediation at the Orlando Events Center Brownfield Site

Stephanie Turkot and Will Moody, Geo-Cleanse International, Inc., Matawan, NJ; Ed Kellar, MACTEC Engineering and Consulting, Inc., Newberry, FL; Barry Robertson, Stillwater Technologies, Orlando, FL; Alan Oyler, City of Orlando, Orlando, FL

### An Effective In Situ Air Stripping Approach for Treatment of 1,4-Dioxane in Groundwater

Omer J. Uppal, Bruce L. Cliff, Michael C. Marley, and Scott C. Crawford, XDD, LLC, Stratham, NH

### Surfactant Enhanced Soil Washing of Oil and Gas Wastes Tank Bottom Sludge, Drilling Cuttings, Oil Sands and Impacted Soils with Associated Oil Recovery Opportunities North and South American Case Studies

Paul Wierbicki, Ivey International, Inc., Lower Kingsclear, NB, Canada; George A. Ivey, Ivey International, Inc., Campbell River, BC, Canada

## RISK ASSESSMENT

### Novel Continuous Ground-Gas/VOC Monitoring and Improved Risk Assessment

Geoff Hewitt, ION Science (Americas) LLC, Waterbury, VT; Peter Morris, University of Manchester, Manchester, UK

## SEDIMENTS

### Sediment Quality Triad Approach for Temporal-Spatial Assessment of Marine Sediment at McAllister Point Landfill

Jackson H. Kiker and Fred Santos, ECC, Marlborough, MA; Winoma A. Johnson, NAVFAC MIDLANT, Norfolk, VA

### New Sediment Remediation Technology Results From A Confined Space Project For Knolls Atomic Power Laboratory

Thomas J. Kryzak, Environmental Lunch Box Technology, Altamont, NY

## SITE ASSESSMENT

### Ambient Concentrations of Polycyclic Aromatic Hydrocarbons in Soil, Fullerton, California

Walter R. Crone, Ninyo & Moore Geotechnical and Environmental Sciences Consultants, Irvine, CA

### Laboratory Validation of the GORE™ Passive Water Sampler

James E. Whetzel and Don D'Apolito, W. L. Gore & Associates, Inc., Elkton, MD

## SUSTAINABLE REMEDIATION

### Sustainable Soil Upgrading by Developing Cost-effective, Biogeochemical Remediation Approaches

Nerea Otaegi and José Enrique Vadillo, LABEIN – Tecnalia, Derio, Spain; Leen Bastiaens, Vlaamse Instelling voor Technologisch Onderzoek, N.V. (VITO), Mol, Belgium; Pauline Van Gaans, DELTARES/TNO, Utrecht, Netherlands; Tim Grotenhuis, Wageningen University and Research Centre, Wageningen, Netherlands; Janusz Kupranek, Instytut ekologii terenow Przemyslowionych (IETU), Katowice, Poland; Lennart Larsson, Statens Geotekniska Institut (SGI), Göteborg, Sweden

### Sustainable Stream Restoration of a Semi Urban Creek near a Superfund Site, NY

Sivaramkrishnan Sangameswaran, Bioengineering Group, Inc, Tallahassee, FL; Doug J Smith and Wendi Goldsmith, Bioengineering Group, Inc, Salem, MA

### Ecologically Sensitive Geotechnical Engineering Solution for an Urban Landfill Site on Mill Creek, Cincinnati, OH

Sivaramkrishnan Sangameswaran, Bioengineering Group, Inc, Tallahassee, FL; Duke Bitsko and Wendi Goldsmith, Bioengineering Group, Inc, Salem, MA

### Simultaneous Oxidative Reductive Chemical Treatment of PAH Contaminated Soils at a Former Manufactured Gas Plant (MGP) Site Using a New Innovative Green Remediation Technology

Paul Wierbicki, Ivey International, Inc., Lower Kingsclear, NB, Canada; George A. Ivey, Ivey International, Inc., Campbell River, BC, Canada; Andrew Wollen, Environmental Remediation Resources Pty Ltd, Moorabbin, Australia

## VAPOR INTRUSION

### Integrated Field-Scale, Lab-Scale, and Modeling Studies for Improving the Ability to Assess the Groundwater to Indoor Air Pathway at Chlorinated Solvent-Impacted Groundwater Sites

Chase Holton, Hong Luo, and Paul Dahlen, Arizona State University, Tempe, AZ; Kyle A. Gorder, Hill Air Force Base, Ogden UT

### Modeling the Effects of Natural Weather Conditions on Temporal Variability in Indoor Air Concentrations at Vapor Intrusion Sites

Hong Luo and Paul C. Johnson, Arizona State University, Tempe, AZ

### Changes in Radon Concentrations Due to Changes in Water Table Depth

Douglas Mose, George Mason University, Fairfax, VA

# 2010 Lifetime Achievement Awards

The Annual International Conference on Soils, Sediments, Water, and Energy is pleased to announce the recipients of the Lifetime Achievement Award. This award is presented to individuals in the areas of industry, academia, government, and military, who have made significant contributions to the understanding and solution of soil, sediment, and groundwater pollution problems. This year's winners are **Stephen Koenigsberg**, The Adventus Group, in the area of industry; **David Brown**, Fairfield University, in the area of academia; **Glenn Suter**, US EPA, in the area of government; and **Leslie Karr**, NAVFAC ESC, in the military sector.

## INDUSTRY

**Stephen S. Koenigsberg, Ph.D.** is Vice President of The Adventus Group in Irvine, California. He has 25 years of environmental remediation experience and is a recognized developer of widely used products and technologies. In addition to continuing in these activities for Adventus, Koenigsberg specializes in the emergent field of expedited site closure. This practice helps define a novel vendor model whereby product recommendations are integrated with suggestions for the use of molecular biological and isotopic diagnostics. This synergy can guide the formation of optimized site management and closure strategies and supports the consultant's role in achieving cost-effective results for their clients.

Koenigsberg was a Founder of Regenesys in 1994, where he co-invented and developed the company's products through 2006; they have been applied to over 15,000 sites world-wide. One of the products, MRC<sup>®</sup>, received a Second Place Award from the *Wall Street Journal* for Technology Innovation in 2004. Before joining Adventus, Koenigsberg was a Principal at ENVIRON International Corporation.

Dr. Koenigsberg has worked as a project team member on numerous sites involving *in-situ* and on-site treatment protocols and has published over 150 technical articles focusing on bioremediation and environmental biotechnology. Koenigsberg received his M.S. and Ph.D from Cornell University. He is a member of several editorial and advisory Boards and is an adjunct professor at The California State University at Fullerton where he also serves as Chairman of the Dean's Advisory Council.

## ACADEMIA

**David R. Brown, Sc.D.** lives in Westport, Connecticut. He is a graduate of Cornell University (B.S.), The University of California at Berkeley (MS) in Environmental Health and of the Harvard School of Public Health, Sc.D. Physiology/Toxicology. Married, he has two children and three grandchildren. Dr. Brown is founding member of Environment and Human Health Inc and an adjunct faculty member of the Applied Ethics Department at Fairfield University in Fairfield Connecticut where he teaches courses in Ethics and the Environment. David Brown is a Public Health Toxicologist who has worked in Academic, the Public and Private sectors. He is past Chief of Environmental Epidemiology and Occupational Health in the Connecticut Department of Health and previously was Associate Professor of Toxicology at Northeastern

University, College of Pharmacy and Allied Health. He has served as Deputy Director of The Public Health Practice Group of ATSDR at the National Centers for Disease Control and Prevention in Atlanta, Georgia and as a consulting toxicologist with the North East States for Coordinated Air Use Management (NESCAUM). He is presently Director of Public Health Toxicology at Environment and Human Health Inc. Dr. Brown is a founding board member of Environment and Human Health Inc, a nonprofit organization dedicated to the protecting public health from environmental harms through research, education and promotion of sound public policy. Dr. Brown has extensive research in Toxicology and in Risk Assessment, Most recently he has written editorials and reports that address the ethical implication of regional and national environmental public health policy decisions. Dr Brown's current research is focused on reduction of childhood exposures to toxics in air, water and in consumer products. He founded the toxicology programs at The University of Maryland School of Pharmacy and at Northeastern University. His early research focused on the effects of heavy metals on the development of the nervous system.

## GOVERNMENT

**Glenn W. Suter II** is Science Advisor in the U.S. Environmental Protection Agency's National Center for Environmental Assessment-Cincinnati. He has a Ph.D. in Ecology from the University of California, Davis, and 32 years of professional experience including 27 years of experience in ecological risk assessment and ecological epidemiology. He is the principal author of three texts in the field of ecological risk assessment, editor of three other books and author of more than two hundred other publications. He is Associate Editor for Ecological Risk of *Human and Ecological Risk Assessment*, and Reviews Editor for the Society for Environmental Toxicology and Chemistry (SETAC). He has served on the International Institute of Applied Systems Analysis Task Force on Risk and Policy Analysis, the Board of Directors of SETAC, an Expert Panel for the Council on Environmental Quality, and the editorial boards of five journals. He is the recipient of numerous awards and honors; most notably, he is an Elected Fellow of the American Association for the Advancement of Science; and he received SETAC's Global Founder's Award, their award for career achievement, and the EPA's Level 1 Scientific and Technical Achievement Award. His research experience includes development and application of methods for ecological risk assessment and ecological epidemiology, development of soil microcosm and fish toxicity tests, and environmental monitoring. His work is currently focused on the development of methods for determining the causes of biological impairments.

## MILITARY

**Leslie A. Karr, P.E.** is a graduate of the University of Southern California, Los Angeles, CA, with an MS in Environmental Engineering and a BS in Biological Sciences. She began her Federal career working at the Naval Civil Engineering Laboratory (now known as the Naval Facilities Engineering Service Center) in Port Hueneme, CA as a Research Environmental Engineer. Over the past 30 years she has been the principle investigator for numerous projects, including Beneficial Reuse

of Dredged sediments, Leak Detection for Bulk USTs & ASTs, Hydrocarbon National Test Site, Depleted Uranium Characterization on test ranges, Long-term Disposition of Seafloor Cables and the Defense Coastal/Estuarine Research Program. She was a past recipient of the SAME Engineer of the Year, the NFESC Engineer of the Year, and the NAVFACENGCOM Engineer of the Year. Leslie currently serves as the Program Director for the Navy Environmental Sustainability Development to Integration (NESDI) research program, sponsored by the Chief of Naval Operations. NESDI is the Navy's RDT&E program for shoreside environmental compliance, pollution prevention, cleanup, conservation, range sustainability, and port operations.

## Call For Abstracts

### 27th Annual International Conference on Soils, Sediments, Water and Energy

October 17-20, 2011

University of Massachusetts, Amherst  
Assessment, Remediation, Regulation and  
the Energy Environmental Interface

#### ENERGY ENVIRONMENT INTERFACE TOPICS INCLUDE:

- "green" remedial technologies
- "green" brownfields
- leadership in energy and environmental design (LEED)
- renewable energy projects on closed landfills and contaminated sites
- carbon footprint and life-cycle analysis
- environmental concerns of alternative energy from cradle to grave
- recycling of demolition debris

#### GENERAL TOPICS:

- bioremediation
- chemical analysis
- cleanup standard setting
- environmental fate and modeling
- hazard exposure and risk assessment
- heavy metals
- hydrocarbon identification
- alternative and innovative technologies
- petroleum contamination
- regulatory programs and policies
- sediments
- site assessment/field sampling
- soil chemistry
- standard remedial technologies/ corrective actions
- case studies on any of the above

#### SPECIAL TOPICS:

- acid mine drainage
- arsenic
- biotechnology
- chlorinated hydrocarbons
- pesticides (PCBs, etc.)
- contaminants of concern,
- contamination at military installations
- dioxin
- ecological risk assessments
- environmental forensics
- MECS
- MTBE
- mercury
- perchlorate
- phytoremediation
- risk based cleanups (RBCA)
- state regulatory programs

#### SUBMISSION INFORMATION AVAILABLE AT [www.UMassSoils.com](http://www.UMassSoils.com)

Publication of manuscripts from both platform and poster presentations will be considered for the general proceedings, Contaminated Soils Vol. 17

**Deadline for Submissions is  
February 4, 2011**

#### FOR MORE INFORMATION CONTACT

Brenna Lockwood  
AEHS Foundation, Inc.  
150 Fearing St., Suite 21, Amherst, MA 01002

# 2010 Scientific Contributions and Foundation Appreciation Award

*In addition to the Lifetime Achievement Awards, the Foundation has created the Scientific Contributions and Foundation Appreciation Award which is given to those individuals who have generously provided their intellectual, physical, and emotional energies to the Foundation's myriad of activities. Because of their active participation and outstanding scientific contributions to the field, we are proud to announce this year's recipients, **Arthur L. Baehr**, US Geological Survey and **Henry H. Tabak**, US EPA retiree.*

**Arthur L. Baehr** worked as a hydrologist for the U.S. Geological Survey for 25 years. He has a B.S. in Mathematics and an M.S. in Environmental Science from Drexel University, and a PhD. in Civil Engineering from the University of Delaware. His PhD dissertation: Immiscible Contaminant Transport in Soils with an Emphasis on Gasoline Hydrocarbons was selected as the best Environmental Engineering Dissertation of 1985 by the Association of Environmental Engineering Professors. Dr. Baehr worked on a broad range of hydrologic investigations. Methods he developed include: gas transport to quantify natural attenuation at gasoline spill sites, vapor extraction remediation design, evaluation of MTBE in the hydrologic cycle, techniques to determine the spatial variability of recharge, and the partitioning of nitrogen and pesticides in agricultural watersheds. A unifying theme of these studies is the development of methods to obtain field scale data and of mathematical modeling to relate unsaturated zone processes to ground water contamination. He effectively parlayed academic programs with his research projects at USGS, most notably with the University of Connecticut, Drexel and Villanova Universities. Currently he is employed with the Pennsylvania DEP as an Energy Program Specialist where he helps manage solar, wind, and biogas renewable energy projects initiated by the Federal Stimulus Program.

---

**Henry H. Tabak** retired in 2006 from his position as a Senior Research Chemist in charge of bioremediation of soils and sediments research studies in the Land Remediation and Pollution Control Division, National Risk Management Research Laboratory, USEPA, Cincinnati, OH. He has over 46 years of research experience in USEPA and its predecessor organizations in the area of microbial degradation of toxic organic pollutants in Aqueous, soil and sediment systems, and in metabolic pathways of biodegradation. Mr. Tabak received a B.S. degree in biology and chemistry from New York City University (CCNY) and an M.S. degree in microbiology from University of Kentucky. Pursued studies towards a Ph.D. degree in microbial physiology and chemistry at the University of Michigan and the University of Wisconsin as part of a USPHS fellowship awarded to him in 1962-1964.

Research Specialties and Extensive Research Experience are in the following areas:

Aerobic and anaerobic biodegradability studies with RCRA priority toxic pollutants, bioaugmentation studies for enhancement of wastewater and soil contaminant biodegradation, development of biotreatability testing protocols, biosystem approaches and technologies for treatment of toxic organics in soils and sediments, electrolytic respirometry methods for determination of biodegradability of toxic pollutant, development of chemical indices of human and agricultural waste pollution, and biodegradation of organic toxic pollutants by white rot fungi.

Most recent research activities included studies for determining bioavailability, biodegradability and toxicity of soil and sediment organic contaminants, development of nutrient delivery systems, biostimulation and bioaugmentation methods for the enhancement of bioremediation of contaminated sediments and soils, acid mine drainage treatment technology research dealing with biokinetics of sulfate reduction by sulfate reducing bacteria (SRB); biosorption of heavy metals on biosorbents, toxicity and inhibition of heavy metals from acidic wastes on SRB and biorecovery of AMD metals. Mr Tabak retired from the USEPA in July of 2006.

ANNOUNCEMENT  
ANNUAL WEST COAST CONFERENCE

The Association for Environmental Health and Sciences (AEHS) Foundation  
is Proud to Announce

The 21st Annual International Conference on

SOIL, WATER,  
ENERGY, AND AIR

and AEHS Foundation Annual Meeting

March 14-17, 2011

Mission Valley Marriott, San Diego, California

March 2011 will mark the 21st annual gathering of environmental professionals to the **Annual International Conference on Soil, Water, Energy, and Air** on the West Coast. For the past 20 years, this annual conference has helped to bring the environmental science community closer together by providing a forum to facilitate the exchange of information of technological advances, new scientific achievements, and the effectiveness of standing environmental regulation programs. Attracting 500 - 600 participants annually, the West Coast Conference is a highly successful and nationally known conference focusing on important and timely environmental issues related to soil, water, energy, and air. Attendees are drawn from a variety of professions including state and federal regulatory agencies, environmental engineering and consulting firms, the petroleum and chemical industries, and academia. The 2011 conference promises to be an exciting opportunity for environmental professionals who are concerned with developing creative, cost-effective assessments and solutions that can withstand the demands of regulatory requirements.

- **Over 200 Presentations – Platform and Poster** •
- **10+ Focused Workshops • Socials • 50 Exhibitors** •

We are currently seeking sponsorship and exhibitors  
Visit the conference website for more information

[www.aehsfoundation.org](http://www.aehsfoundation.org)

or contact

**Brenna Lockwood**

AEHS Foundation, Inc.

150 Fearing St., Suite 21, Amherst, MA 01002

413-549-5170 P • 413-549-0579 F

[brenna@aehsfoundation.org](mailto:brenna@aehsfoundation.org)

**Call For Exhibitors**

We are happy to invite you to exhibit at the

**27th Annual International  
Conference on  
Soils, Sediments, Water  
and Energy  
October 17-20, 2011**

The Soils, Sediments, Water and Energy Conference has become a leading national/international conference in this important environmental area. The conference attracted nearly 600 attendees last year including a wide variety of representation from state and federal agencies; the military; various industries including railroad, petroleum, transportation and utilities; the environmental engineering and consulting community; and academia.

The exhibit area is located in the center of the conference activity to assure maximum contact and exposure with interested conference participants and potential customers. Exhibition space is limited to 48 booths to insure a high ratio of attendees to exhibitors. The rental fee for an 8' by 10' exhibit booth space is \$1195.00. Outdoor areas are available for equipment demonstrations at an additional cost.

**PRESENTATION TOPICS**

- bioremediation
- chemical analysis
- cleanup standard setting
- environmental fate and modeling
- hazard exposure and risk assessment
- heavy metals
- hydrocarbon identification
- alternative and innovative technologies
- petroleum contamination
- regulatory programs and policies
- sediments
- site assessment/field sampling
- soil chemistry
- standard remedial technologies/ corrective actions

**WHY SHOULD YOU EXHIBIT**

Attendees buy products and services such as:

- analytical instruments and services
- environmental software
- monitoring equipment
- excavation equipment
- remediation equipment and services
- training and education products and services

**THE PRICE OF YOUR BOOTH SPACE  
INCLUDES**

- One conference pass for admission into general sessions
- List of conference attendees
- 2' by 6' table and two chairs
- Pipe and drape
- Electrical power outlet

**SPONSORS AND SUPPORTERS**

- Adventus Group • AECOM • Air Force Research Laboratory (AFRL) • American Petroleum Institute

**CONFERENCE CO-DIRECTORS:**

Paul Kostecki, Ph.D.

Edward J. Calabrese, Ph.D.

Clifford Bruell, Ph.D.

Please join Dr. Paul Kostecki and Dr. David Ludwig, Director for Education and Training, AEHS Foundation on Wednesday, October 20, 2010 at 7:00pm in room 168 (Campus Center) for a special information session to discuss the Foundation's latest venture: Professional Education and Online Learning. We will be addressing questions related to online teaching and learning and encourage anyone interested in participating in, or potentially teaching for AEHS Online to attend.

### Online Classes Include:

Basic Toxicology  
Systems Ecology  
Population Biology  
Chemical Fate  
and Transport  
Conceptual Models  
Regulation and Policy

The AEHS Foundation Professional Education Series is pleased to offer the following two, 12-week, online courses coming February 2011. CEU credits available upon request, space limited, special discounts for AEHS Foundation members and students. Both courses are:

#### IDEAL FOR

- scientists • engineers • decision makers • health specialists • environmental managers
- public health officials

#### CONCERNED WITH

- habitat • biodiversity • climate change • urbanization • transportation • introduced species
- pathogens • water and wastewater • air quality • hazardous materials • chemical exposure risks

2 CLASSES COMING FEBRUARY 2011

## ECOLOGICAL RISK ASSESSMENT FOR A SUSTAINABLE ENVIRONMENT

Taught by **DR. DAVID LUDWIG**

ARCADIS Global Environmental Consultancy and Director of Education and Training, AEHS Foundation

This course offers a broad introduction to the state-of-the-science and the practice of ecological risk assessment in multi-stressor contexts. Students are exposed to an array of the interrelated disciplines that are the foundation of ecological risk assessment. These include among others: stressor identification, systems ecology, population biology, chemical fate and transport, basic toxicology, restoration science, resource allocation, regulatory policy and guidelines, comparative risk analysis, and net outcomes evaluation. Case studies are presented to frame discussion and debate. In true whole-system fashion the class takes a global perspective, and we cover issues and examples from around the world and from varied ecosystems, from open oceans and alpine highlands to deserts, estuaries, wetlands, and densely settled urban environments.

## MANAGING RISKS: WHAT TO MEASURE AND HOW TO ASSESS THE "BEST CHOICE"

Taught by **DR. PAOLO RICCI**

Adjunct Professor, UMass Amherst, School of Public Health

This course introduces practical and theoretical quantitative applications of risk analysis and management – viewed as a decision-making support process. The primary focus of this course is to acquaint students with a set of decision-making principles and decision analysis tools, and demonstrate how these principles and tools apply to environmental management. In addition to the disciplines covered in both courses, this class will go into toxicological models, cancer and models including epidemiology. Course objectives include:

- Develop decision-making frameworks for assessing the "best" outcome and thus guide a final decision.
- Understand the role that informed judgment plays in justifying choices.
- Describe the logic of a risk-driven problem.
- Know how to resolve uncertainty, risk and ambiguity.
- Be knowledgeable of paradoxes and other issues that affect the implementation of any rational choice.
- Be able to develop a causal model describing the chain of events from emissions to final adverse health effect, model these and propagate the uncertainty throughout via Monte Carlo Simulations.
- Develop a simple risk-cost-benefit analysis of an environmental problem of a student's choice and understand the limitations of that analysis.
- Understand the differences between toxicological and cancer models, be able to interpret the results from those models and understand the limitations of the analysis at very low dose rates.
- Be able to develop a simple fault tree and a simple event tree applied to an accident, formulate the proper probabilistic aspects of those trees and apply the results to a case study.

# Exhibitors

Booth	Affiliation
B1	Regenesys
B2	LSP Association
B3	Adventus Americas
B4	Zebra Environmental
B5	US EPA -TIFSD
B6	Stone Environmental
B7	Accutest Laboratories

The Annual International Conference on Soils, Sediments, Water and Energy is pleased to call for

## Nominations for the Lifetime Achievement Award

This award is given to individuals in the areas of industry, academia, government and military, who have made significant contributions to the understanding and solution of soil, sediment and groundwater pollution problems. The Life Achievement Award Committee is looking for nominations for the 2011 award.

Please send your nominations for next year's awards to

**Barbara Callahan, [bcalla39@comcast.net](mailto:bcalla39@comcast.net)**

Include an email, phone number, and mailing address for the nominee.

### SCIENTIFIC ADVISORY BOARDS

*AEHS attributes the success of this conference, in large part, to a very dedicated and hard working Scientific Advisory Board (SAB). The SAB evaluates abstract submissions, recommends invited papers and presenters, advises with regard to session topics, and serves as conference ambassadors. The SAB is crucial to the conference development. Care is taken to create a board that represents philosophical, scientific, regulatory, and geographical balance.*

#### GENERAL

Ernest C. Ashley, P.G., LSP, LEP, CHMM, CDM  
 Ralph S. Baker, Ph.D., TerraTherm  
 Bruce Bauman, American Petroleum Institute  
 Mark Begley, LSP, Environmental Management Commission  
 B.K. Behera, Sanmar Speciality Chemicals  
 Scott R. Blaha, P.E., GE  
 Carol de Groot Bois, LSP, Bois Consulting Company  
 Clifford J. Bruell, Ph.D., University of Massachusetts Lowell  
 Matthew Burns, WSP Environment & Energy  
 Barbara Callahan, Ph.D., DABT, University Research  
 Robert H. Clemens, Golder Associates  
 Cynthia Cogan, AECOM Environment  
 Andrew Coleman, Ph.D., Lehigh University  
 Janine Commerford, MA DEP  
 Marcelo Conti, University of Rome  
 Kathy Creighton, LSP, Shaw Group  
 Maureen Dooley, Regenesys  
 James Dragan, Ph.D., The Dragan Corporation  
 John W. Duggan, Wentworth Institute of Technology  
 Mohamed Elnabarawy  
 Kevin T. Finneran, Ph.D., University of Illinois at Urbana/Champaign  
 John Fitzgerald, MA DEP, Bureau of Waste Site Cleanup  
 Millie Garcia-Serrano, M.P.H., MA DEP, South East Region  
 Jennifer Griffith, Northeast Waste Management Officials' Association  
 P. K. Jaiwal, M.D. University  
 Robert Kelley, ARS Technologies  
 William B. Kerfoot, Kerfoot Technologies  
 Stephen S. Koenigsberg, Ph.D., Adventus Group  
 Fayaz Lakhwala, Ph.D., Adventus Group  
 Kenneth Y. Lee, Ph.D., P.E., University of Massachusetts Lowell  
 David Ludwig, ARCADIS U.S.  
 Rick McCullough, MA Turnpike Authority  
 Chris Mitchell, C.G., AECOM  
 Ellen Moyer, Ph.D., P.E., CH2M HILL  
 Jim Mueller, Adventus Americas  
 Willard Murray, Ph.D., P.E., ECC  
 Lee Newman, Ph.D., Brookhaven National Lab

Om Parkash, Ph.D., University of Massachusetts Amherst  
 Gopal Pathak, Ph.D., Birla Institute of Technology  
 Frank Peduto, P.E., B.S.C.E., Spectra Environmental Group  
 Ioana G. Petrisor, Ph.D., Haley & Aldrich, Inc.  
 Paul Rakowski, P.E., B.C.E.E., AGVIQ, LLC  
 Richard Raymond, Terra Systems  
 Paolo Ricci, University of Massachusetts Amherst  
 Dawn M. Riley, LSP, American Seafoods International, LLC  
 Tracy Roth, P.G., LFR Inc., an ARCADIS Company  
 Scott Saroff, CPG, M.S., P.G., Michael Baker, Jr.  
 Julia Sechen, MA DEP  
 Paula L. Sturdevant Rees, Ph.D., University of Massachusetts Amherst  
 David F. Sullivan  
 Frank Sweet, AECOM  
 Christopher Teaf, Ph.D., Florida State University  
 James C. Todaro, Alpha Analytical Labs  
 Stephen P. Truchon, ARCADIS  
 Mark Vigneri, Environmental Remediation and Financial Services  
 Dallas Wait, Ph.D., Gradient Corporation  
 Richard Waterman, EA Engineering, Science, and Technology  
 Jason C. White, Ph.D., Connecticut Agricultural Experiment Station  
 Paul A. White, Health Canada  
 Katie Winogroszki, 3M  
 Peter Woodman, Ph.D., Risk Management Incorporated  
 Raymond S.H. Yang, Ph.D., FATS, Colorado State University  
 Luo-Ping Zhang, Xiamen University

#### FEDERAL ADVISORY BOARD

John Cullinane, US Army Engineer Waterways Exp. Sta.  
 John Glaser, US EPA, ORD  
 Douglas W. Grosse, US EPA  
 Ann Marie Jarabek, US EPA  
 Leslie Karr, P.E., NAVFAC ESC  
 Mike Reynolds, Ph.D., USA - Cold Regions Research and Engineering Laboratory (CRREL)  
 Alex Sherrin, LSP, US EPA Boston  
 Paul J. Yaroschak, P.E., B.E.C.E., M.S.C.E., Office of the Secretary of Defense

# 2010 Conference at a Glance

Platform sessions and workshops may run concurrently, please check the schedule carefully.

## Monday, October 18, 2010

### Workshops

1. **Assessment and Evaluation of Vapor Intrusion at Petroleum Release Sites** (8:00am – 12:00pm) Rm 163, Lower Level
2. **Enhanced NAPL Recovery Using Surfactants** (1:00pm – 5:00pm) Reading Room, Concourse Level
3. **Geochemical Evaluations of Metals in Environmental Media: How to Distinguish Naturally Elevated Concentrations from Site-Related Contamination** (1:00pm – 5:00pm) Rm 917, 9<sup>th</sup> Floor
4. **Hands-On Sustainability Assessment Tools** (1:00pm – 5:00pm) Rm 168, Lower Level
5. **Environmental Fate of Hydrocarbons in Soils and Groundwater** (2:00pm – 5:00pm) Rm 101, Lower Level
9. **Utilization of Stable Isotopes in Environmental and Forensic Geochemistry Studies** (2:00pm-4:00pm) Rm 163, Lower Level

## Tuesday, October 19, 2010

### Platform Sessions

#### Morning, 8:30am-Noon, Sessions are concurrent

- Session 1: **Marcellus Shale Development: Associated Issues and Impacts**, Rm 163, Lower Level  
Session 2: **Sediments**, Rm 101 Lower Level  
Session 3: **Phytoremediation** (starts at 9:00), Reading Room, Concourse Level

#### Afternoon, 1:30pm-5:30pm, Sessions are concurrent

- Session 1: **Sustainable Remediation**, Rm 163, Lower Level  
Session 2: **Clean Energy**, Rm 101, Lower Level  
Session 3: **Nanotechnology**, Reading Room, Concourse Level  
Session 4: **International Soil & Groundwater Remediation Case Histories**, Rm 168, Lower Level

**Poster Session** 4:00pm - 6:00pm, Rm 162 and 165, Lower Level

**Social** 4:30pm-6:00pm, Exhibit Areas

### Workshops

6. **Nanotechnology: Applications in Environmental Remediation** (7:00pm – 9:00pm), Rm 163, Lower Level
7. **LSP Board Disciplinary Case Workshop** (6:30pm – 9:30pm), Rm 101, Lower Level
8. **In-Situ Thermal Remediation** (6:30pm – 9:30pm), Rm 168, Lower Level

### LUNCHEON

12:00pm – 1:30pm  
Amherst Room, 10th Floor,  
Campus Center

**SPEAKER: Annetta Watson**  
Oak Ridge National Laboratory,  
Oak Ridge, TN

**“Developing Health-Based  
Pre-Planning Clearance  
Guidelines for Site  
Remediation Following a  
Chemical Terrorist Attack”**

## Wednesday, October 20, 2010

### Platform Sessions

#### Morning, 8:30am-Noon, Sessions are concurrent

- Session 1: **Vapor Intrusion I**, Rm 163, Lower Level  
Session 2: **NAPL** (starts at 9:00), Rm 101, Lower Level  
Session 3: **Degradation of Polychlorinated Biphenyls** (starts at 9:00), Reading Room, Concourse Level

#### Afternoon, 1:30pm-5:00pm, Sessions are concurrent

- Session 1a: **Vapor Intrusion II**, Rm 163, Lower Level  
Session 1b: **Regulatory Panel Discussion: Grappling with Vapor Intrusion**, Rm 163, Lower Level  
Session 2: **PCBs**, Rm 101, Lower Level  
Session 3: **Environmental Forensics**, Reading Room, Concourse Level  
Session 4: **Site Remediation – Diagnostics, In-Situ Treatment, and Vapor Intrusion**, Rm 168, Lower Level

**Poster Session** 4:00pm-6:00pm, Rm 162 and 165, Lower Level

**Wine Reception** 5:00pm-7:00pm, Exhibit Hall, First Floor

**AEHS Online Information Session** 7:00pm-8:00pm, Rm. 168, Lower Level

### Workshops

10. **In-Situ Chemical Oxidation** (6:30pm-9:30pm) Rm 163, Lower Level
11. **Incorporating Green into the Cleanup Dialogue: The Green Remediation, Sustainable Remediation, and Green Chemistry Workshop** (7:00pm-9:00pm) Rm 101, Lower Level

### LUNCHEON

12:00pm – 1:30pm  
Amherst Room, 10th Floor,  
Campus Center

**SPEAKER: Derek Lovley**  
University of Massachusetts,  
Amherst, MA

**“Wiring Microbes to  
the Sun: Sustainable  
Energy and  
Bioremediation with  
Microbe-Electrode  
Interactions”**

## Thursday, October 21, 2010

### Platform Sessions

#### Morning, 8:00am-Noon, Sessions are concurrent

- Session 1: **Bioremediation** (starts at 9:00) Rm 163, Lower Level  
Session 2: **Heavy Metals**, Rm 101, Lower Level  
Session 3: **Fate & Transport** (starts at 8:00) Reading Room, Concourse Level

#### Afternoon, 1:30pm-5:30pm, Sessions are concurrent

- Session 1: **Innovative and Alternative Remedial Technologies**, Rm 163, Lower Level  
Session 2: **Site Assessment/Field Sampling**, Rm 101, Lower Level  
Session 3: **Advanced Tools**, Rm 168, Lower Level

### LUNCHEON

12:00pm – 1:30pm  
Amherst Room, 10th Floor,  
Campus Center

**SPEAKER:**  
**Tim Kruppenbacher**  
General Electric, Albany, NY

**“Update on the Hudson  
River Dredging Program”**
